

### ***PERSONAL PROFILE:***

Name : Guttula Srikrishna Sivesh  
Father's Name : G.V.S.N.Murthy  
Mother's Name : G. Vijaya Lakshmi  
Date of Birth : 12<sup>th</sup> March 1996  
Siblings : Uttam Hanush (elder brother)

### ***FAMILY BACKGROUND:***

I come from a small family with four members. They are my parents, my elder brother and me. My father is a government employee in ITDA (Integrated tribal Development Agency) as J.T.O. And my mother, she is a home maker. In addition to, she teaches Carnatic music. Lastly, my brother is a Technology analyst at Infosys Company in Hyderabad and was born eight years before me. He is recently married. My family make me feel comfortable and confident every time. They are my strength.

### ***ABOUT ME:***

I was born on 12<sup>th</sup> march 1996 in Vizag. I've done my studies up to 5<sup>th</sup> standard in government schools of different areas in A.P. I was joined in a private school in 6<sup>th</sup> class at Rajahmundry. Although I didn't do well, it's where I came to learn the concepts of the subjects. Up to 9<sup>th</sup> class I stayed in Rajahmundry and in 10<sup>th</sup> standard I went to Parvathipuram and I got 480 marks in 10<sup>th</sup> class. And after that I was well motivated to learn the subjects in inter M.P.C. I've done well in inter first year and got 90% in first year. In second year I couldn't concentrate on the studies as there is a lot of stress on reading. I've got 880 marks in inter I.P.E. I tried my best in the EAMCET and got a rank of 30097.

### ***I JOINED THIS COURSE BECAUSE:***

Main reason for me to join this course is I can justify my field. I am very much interested in programming from the beginning of my B.tech. I want to develop my programming skills by increasing the efficiency of the program and I want to increase my thinking abilities and how to solve a problem in more ways and know the practical applications of what we write. I know that what we learn in the curriculum is not enough to survive in the real world. I would like to learn the new programming platforms as you provide one PYTHON. And I'm much passionate about programming. So I couldn't leave this good opportunity.
